DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-5, 8, 9, 43, 44, 45, 47, 51 and 62 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4, 8 and 9 of U.S. Patent No. 6,523,614. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present invention present a broader scope to the claims of U.S. Patent No. 6,523,614 by slight changes in the claim language and the removal of limitations, which would have been obvious to one of ordinary skill in the art at the time the invention was made.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 48-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 48 is mistakenly dependent from claim "37" which does not contain the required antecedent basis for the limitations of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 52-54 and 61 are rejected under 35 U.S.C. 102(b) as being anticipated by Meaders et al. Meaders et al. discloses a method for communicating hydraulic fluid through a tubing retrievable safety valve having a hydraulic chamber. The method includes locating a communication tool having a cutting device 92 within the tubing retrievable safety valve 22. The cutting device is axially aligned with the hydraulic chamber using dogs 100. During this alignment rotation of the cutting device will occur relative to the hydraulic chamber 44. Mechanical cutting with the cutting device between the hydraulic chamber and the interior of the tubing retrievable safety valve creates a fluid passageway 246. Axial alignment is achieved through shifting of a first section 67 of the communication tool against a second member 70 of the communication tool. This movement shears a shear pin 82.

Allowable Subject Matter

7. Claims 10-42 and 70-77 are allowed.

8. Claims 6, 7, 46, 55-60 and 63-69 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
